PRATIK GOLE

Java Backend Developer

golepratik8@gmail.com | +91 70576 63067 | Pune, India | linkedin.com/in/golepratik8 | github.com/pratik0820

SUMMARY

Java backend developer with 2.5+ years building secure, scalable Spring Boot microservices for fintech, payments and subscription platforms. Built event-driven pipelines with Kafka and Redis for a corporate card platform, a compliance and risk portal with a configurable rule engine, and sole-owned a production subscription backend on AWS. Strong in REST API design, API security (JWT, TOTP two-factor authentication), and code quality through automated testing and SonarQube gates. Comfortable owning backend modules end to end, from design and development to production deployment.

PROFESSIONAL EXPERIENCE

Java Backend Developer — Prysoms Systems *Jan 2024 – Present | Pune, India*

- Own backend delivery across 3 production platforms in payments, regulatory technology and subscriptions, taking features from design through to AWS deployment.
- Cut book search time from 1–2 seconds to 100–200 ms (about 10x faster) on a catalog of 12 lakh+ records by introducing Elasticsearch full-text search on the ElJunto Book Club platform.
- Built event-driven pipelines with Kafka across 5 microservices on the NPCI RuPay corporate card platform, decoupling services and enabling near-real-time dashboards.
- Delivered compliance and regulatory reporting for a merchant risk portal, with automated MIS reports in 3 formats (Excel, PDF, CSV) and zero-downtime database upgrades.
- Secured platforms handling financial and subscription data with role-based access control, two-factor authentication and tenant-level data isolation.
- Maintained code quality through automated testing, SonarQube quality gates enforcing 80%+ coverage, and GitLab CI/CD releases.

PROJECTS

NPCI RuPay Corporate Card Portal — Microservices Platform (Java 17, Spring Boot, Kafka, Redis, PostgreSQL)

- Built backend modules for issuer onboarding, BIN management, card issuance and corporate employee mapping across the orchestration, admin, issuer, notification and scheduler services.
- Implemented Kafka event pipelines for bulk card processing, transactions, report generation and audit trails, plus Redis-backed live counters with health-check failover.
- Developed multithreaded asynchronous schedulers (CompletableFuture, thread pools) for card-status synchronisation and transaction ingestion, and a PGP utility for secure cardholder file exchange.

Merchant Compliance & Risk Management Portal (Java 8/17, Spring Boot, Spring Security, MySQL, AWS EC2/S3)

- Developed the transaction-monitoring backend, including a configurable rule engine that generates compliance alerts and routes flagged transactions through review and case-management workflows.
- Implemented role-based access control, JWT with refresh-token rotation and TOTP two-factor authentication; encrypted sensitive configuration with Jasypt.
- Automated regulatory MIS reporting in Excel, PDF and CSV (Apache POI) with scheduled emails; delivered schema-migration scripts for zero-downtime upgrades.

ElJunto Book Club — Subscription SaaS Platform (Java 17, Spring Boot 3, PostgreSQL, AWS) — Sole Backend Developer

- Implemented Apple App Store and Google Play subscription verification with server-side receipt validation, lifecycle state management and billing webhooks that keep user entitlements in sync.
- Integrated AWS Secrets Manager, S3, SES, Elasticsearch full-text search, WebSocket real-time features and Firebase push notifications; deployed on EC2 with PostgreSQL on RDS via GitLab CI/CD.

SKILLS

Languages & Frameworks: Java 8/17, SQL, Spring Boot, Spring MVC, Spring Security, Spring Data JPA, Hibernate
Architecture & Messaging: Microservices, REST APIs, Multi-tenant systems, Multithreading, Apache Kafka, Redis, WebSocket, JWT
Database & Cloud: PostgreSQL, MySQL, AWS (EC2, S3, RDS, IAM, Secrets Manager, SES)
Tools & Workflow: GitLab CI/CD, Docker, Maven, Nginx, JUnit 5, Mockito, SonarQube, Postman
AI-Assisted Development: Cursor, Kiro, Codex, Claude

EDUCATION

B.Sc. Computer Science — Savitribai Phule Pune University (2023) | CGPA: 8.26/10

CERTIFICATIONS

Java Full Stack Developer Course — IT Shaala, Pune (Jul 2023 – Dec 2023)
AI Fundamentals — IBM SkillsBuild (2026)
